We understand our Customers' Mission

The many uses of technology on campus...

CDW•G Higher Ed mission

Our products and services should allow IT, faculty and staff to leverage technology to enhance the learning experience and create a 21st Century Campus where students want to enroll and remain through degree completion.

We are an extension of your IT team and our breadth and depth of technology partners and products will help you accomplish this mission.

CDW•G can directly support our customers' mission

CDW•G Green Policy

- » We use 'environmentally friendly' boxes and packing materials that are 100 percent recyclable.
- » When products are repackaged, our distribution center reuses all packaging material that came from the manufacturers.
- » Recycling bins are located throughout the company to collect paper goods, bottles, cans, and toner cartridges.
- » Internal publications and communications with manufacturers are primarily distributed via email.

CDWG Green Policy

- » Many products are Energy Star compliant
- » We offer disposal programs through our network of service provider partners
- » Energy saving plans
 - Our Distribution Centers have scanners on the lights so when no one is present the overall lighting drops to 30% instead of 100%
- » Although CDWG does not manufacture products that create hazardous waste, we have a list of procedures for departments encountering hazardous waste

Partnership with Funding Factory

- » Free containers and shipping for agencies, schools, and businesses wishing to donate used printer cartridges and cellular phones
- » Environmentally friendly and students benefit
- » Eligible donations turn into points for designated schools
 - Points can be exchanged for new technology for the classroom
- » <http://www.fundingfactory.com/>

What is disposal?

Definition:

The retirement, redeployment, remarketing and recycling of desktop computers, notebooks, servers, networking equipment and associated peripherals.

Disposal partnerships
