Invitrogen Corporation/Life Technologies: 96-well Tube Format

96-well Tube Format

Invitrogen provides oligos in a 96-well tube format. These oligos have different (lower) prices-per-base.

- This is a scenario where using an Excel spreadsheet ordering format is appropriate, given the large number of oligos to synthesize.
- Please note: Invitrogen will provide oligos in a "96-well plate format" when you have a minimum of 48-or-more oligos in your order.
- There can also be several permutations of oligo-requirements in the "plate format," i.e., Standard concentrations, equivalent volumes, etc.

For further information and pricing on 96-well tube formats, contact David Fahmy at 800.955.6288 ext 66534 or email: david.fahmy@invitrogen.com
