Buy Remanufactured Toner Cartridges

Departments can lower supply costs and reduce solid waste by using remanufactured cartridges. Toner cartridges and print cartridges can be recycled through an exchange program with several local suppliers.

Contract suppliers disassemble, clean and refill used cartridges with new toner or ink. Remanufactured cartridges can be purchased for almost half the cost of an OEM (original) cartridge and are 100% guaranteed.

Contact the following suppliers for more information about remanufactured toner and print cartridges:
